

FIRMWARE VERSIONS OF THE WIRELESS GROUPSETS COMPONENTS

FIRMWARE VERSIONS

In this document the new firmware versions of the components are listed, made available through the MyCampy 3.0 app (Android or Ios).

Once connected to the rear derailleur with your smartphone, if your component has an out of date firmware, you will have the opportunity to update the component itself.

The components that can be updated are: rear derailleur, front derailleur and Ergopowers shifters

Key

Date: this is the release date of the new firmware.

Firmware Version: this is the firmware identification number. To see which firmware your components have, use the MyCampy 3.0 app

Description: this is the description of the new features introduced with the new firmware

In blue last update
